myhosting.com® launches affordable Microsoft® SQL Server™ for Small Business

Toronto, Ontario --- October 29, 2003

myhosting.com, a leading global provider of affordable and superior web and application hosting services and a brand of SoftCom Technology Consulting Inc. announces the addition of three new products and services to the current web hosting portfolio. The new products which include SSL certificates, Search Engine Optimization Tools, and Shared Microsoft® SQL Server™ will complement the existing range of web hosting services.

"myhosting.com continues to stand out as one of the top hosters in the market," says Mandy Davis, Operations Manager at NetCraft (www.netcraft.com). "Their commitment to delivering the latest technologies can be seen in their fast adoption and deployment of Windows Server 2003, where they currently eclipse any of the competition on this platform."

The company has recently begun offering plug-and-play, InstantSSL certificates which can be used to enable industry standard privacy and security on any website. Customers will have a choice of SSL certificates starting at $49.00 per year, a fraction of the cost currently being charged by other leading vendors.

myhosting.com also offers customers the ability to easily optimize and promote their website. Three plans made available to customers allows them to submit their website to hundreds of the top search engines as well as perform a full diagnostic check on their site's readiness for search engines. Instant results will provide the customer with ways to improve their site prior to submission. The NetMechanic service starts at $44.95 per year.

In addition, myhosting.com has released Microsoft Shared SQL database hosting plans. Starting from $25.00 per month, customers can use MS SQL to create dynamic, database driven web sites. A graphical, web-based management interface gives users an easy way to administer their databases.

The release of these products into the company's product portfolio further exemplifies myhosting.com's commitment to providing affordable and superior hosting products to their customers.
